COMPANY OVERVIEW

ProGlobalPartners, LLC (PGP) is a small Disadvantaged Minority Owned Business. Established in 2013 as an export/import management company, PGP helps U.S. companies access foreign markets and helps foreign companies access U.S. products and services.

PGP accesses only the best-in-class American made building materials, engineering components, technology solutions, training certifications, installation support and logistics.

PGP supports U.S. government installations world-wide using a process that is simpler and more convenient for all parties involved.

The greatest challenges to overseas U.S. government contractors are access to quality products and services from the contiguous U.S. at competitive prices.

PGP:

- Possesses an extensive portfolio of manufacturers, distributors, and suppliers
- Logistics partners are bonded and insured
- Uses only NVOCC (Non-Vessel Operating Common Carriers) specializing in containerized export import services with the ability to provide door-to-door logistics for US Flag impelled cargo
- Has direct access to the materials and support services most desired by foreign contractors

As a result, PGP can offer a streamlined process, with negotiated best pricing to make quotations extremely competitive when compared to traditional supply chains.

CORE COMPETENCIES

- Quotation & Estimation Support
- American-made Products, Engineering Components & Technology Solutions Access
- Manufacturer Led Contractor Training & Certification
- Installation & Commissioning Support
- Engineering & Design Services
- Logistics Support
- Language & Cultural Integration Support Services

CLIENTS SERVED

- General Construction Contractors
- Facilities Management Companies
